DETAILED ACTION

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 48 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a flameless tracer used for trace of flight OR a flameless tracer comprising an opaque projectile body, does not reasonably provide enablement for a flameless tracer used for trace of flight AND comprising an opaque projectile body. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims. Specifically in numerous places the specification discloses that the projectile MUST be made of transparent or translucent material to provide trace to target and “if the user wants marking with no trace then the [projectile] should be made of opaque material”. It is not clear how the projectile can provide trace of flight when the flameless tracer comprises an opaque projectile body.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 48 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Endriz (US Patent # 4,934,273). Endriz discloses a flameless tracer that can be used for trace of flight for a

projectile comprising an opaque projectile body, comprising a high output light emitting diode in the projectile, which upon set back of the projectile, is energized by a power source in the projectile.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
